Visiant

Company Profile

Visiant is one of Italy's leading providers of complete Information & Communication Technology solutions and services.

Visiant's objective is to add value to businesses and contribute to their success by offering ICT solutions in a concrete, flexible and efficient manner, leaving companies free to concentrate on their business.

Its solid, flexible structure of 2,000 professionals enables public and private companies to grow technologically and organizationally, in line with their specific goals and spheres of operations.

Today, its specialist business units cover all key areas of ICT: Enterprise, Outsourcing and Web 2.0, Unified Communication and Technology. Visiant Consulting offers customers top-level skills and expertise in the management of processes and technologies that have the biggest impact on businesses and organizations.

Created in 2000, Visiant has successfully established a consolidated presence on the market thanks to its concrete approach and a rapid effective response to the real needs of medium and large organizations.

Through acquisitions, service offering expansion, continuous know-how integration and specialized skills, Visiant has been able to successfully interpret new market demands, thus realizing a growth path both in the domestic and in the international markets.

In 2009 Visiant's revenues were 140 million Euros.

These results are the fruit of teamwork from a skilled and motivated workforce and a determined management team capable of effectively managing increasing levels of complexity.
